

Global View - 生命的奇迹 (C0255)

Global View - The Miracle Of Life (C0255)

对话 / Dialogue

- A Continuing with our class, today we are going to study briefly the miracle of life. Many of you may think you already know how babies come to be, but I am sure that some of the things that we will be talking about today may surprise you. Billy can you turn on the projector please? Thanks. Ok, does anyone know what this is?
接着上节课，今天我们要简要地学习一下生命的奇迹。你们许多人可能觉得自己已经知道婴儿是怎么产生的，但我敢肯定，今天我们要讲的一些内容可能会让你们大吃一惊。比利，能帮忙把投影仪打开吗？谢谢。好，有谁知道这是什么吗？
-
- B Looks like a goat head to me!
在我看来像是一个山羊头！
-
- A Nice try, but this is a woman's womb which contains her uterus and ovaries. The ovaries are packed with eggs and each month during the middle of the menstrual cycle, the ripest one will be sucked up by one of the fallopian tubes. This is called ovulation and the exact time of ovulation depends on the length of your cycle. In an average 28 day cycle, ovulation will most likely happen between the 12th and 15th days, counting day 1 as the first day of your last period. 想得不错，但这是女性的子宫，里面包含她的子宫和卵巢。卵巢里满是卵子，每个月在月经周期中期，最成熟的那颗卵子会被其中一条输卵管吸入。这叫作排卵，排卵的确切时间取决于你周期的长短。以平均28天的周期来说，如果把上次月经的第一天算作第1天，那么排卵最有可能发生在第12天到第15天之间。
-
- B That's amazing! So each month, the woman produces these eggs and then waits for them to be fertilized?
太神奇了！那么每个月，女性都会产生这些卵子，然后等待它们受精吗？
-
- A Actually, every woman is already born with over four hundred thousand eggs! Some will start dying off immediately and others released during her fertile period.
其实，每个女性一出生就已经带有四十多万颗卵子了！有些会立即开始死亡，其他一些则在她的可孕期释放出来。
-
- B What about the guys? I know they produce sperm and stuff.
那男人呢？我知道他们会产生精子什么的。
-

- A That's right! The man's body has a tiny factory that produces sperm twenty four hours a day! Each ejaculation will release about a hundred million sperm so the factory is always pretty busy. The sole purpose of a sperm's life is to fertilize the woman's egg.

没错！男性的身体里有一个小工厂，一天二十四小时不停地产生精子！每次射精会释放出大约一亿个精子，所以这个工厂总是相当忙碌。精子生命的唯一目的就是使女性的卵子受精。

- B So, then we basically need to put one-and-one together so we can have babies right?
那么，我们基本上就是要把两者结合到一起，这样就能生孩子了，对吧？

- A Yes, the man will have an orgasm during intercourse and ejaculate sperm and semen. Now this is where the race begins and all those millions of sperm will race and swim from the cervix, through the uterus to the fallopian tubes. This could take anywhere from forty five minutes to twelve hours! Not all of them make it, since some go the wrong way and get lost or simply die. Many will actually reach the egg but only one will penetrate it and fertilize it. Once this happens, the egg instantly changes and creates a protective shield once the sperm is safely inside.

对，男性会在性交时达到高潮并射出精子和精液。这时比赛就开始了，那数百万个精子会从子宫颈出发，穿过子宫奋力游向输卵管。这个过程可能需要四十五分钟到十二个小时不等！并不是所有精子都能到达，因为有些会走错方向而迷失或干脆死掉。许多精子确实能到达卵子，但只有一个能穿透并使它受精。一旦发生这种情况，卵子会立刻发生变化，在精子安全进入后形成一层保护壳。

- B And then? That's it?
然后呢？就这样吗？

- A Well, the egg will be fertilized within about 24 hours of its release. The genetic material from the sperm combines with the genetic material in the egg to create a new cell that will rapidly start dividing. The woman is not actually pregnant until that bundle of new cells, known as the embryo, travels the rest of the way down the fallopian tube and attaches itself to the wall of her uterus. Any other questions? Then let's move on.

嗯，卵子会在释放后约24小时内受精。来自精子的遗传物质与卵子中的遗传物质结合，形成一个新的细胞，这个细胞会迅速开始分裂。直到那团被称为胚胎的新细胞沿输卵管走完剩下的路程，并附着到子宫壁上，女性才算真正怀孕。还有其他问题吗？没有的话，我们就继续吧。

重点词汇 / Key Vocabulary

womb	名词	人类女性的子宫；胞宫
------	----	------------

ovulation	名词	成熟卵子从卵巢排出的过程；排卵
-----------	----	-----------------

ejaculation	名词	男性生殖器官排出精液的过程；射精
embryo	名词	在人类中，指子宫内处于发育早期阶段的幼体；胚胎
wall	名词	界定物体物理边界的最外层；壁、壁层

补充词汇 / Supplementary Vocabulary

urethra	名词	男性解剖结构中输送精液的部分；尿道
vas deferens	名词	精液经过的那条特定管道；输精管
scrotum	名词	容纳睾丸的囊袋；阴囊
pre menstrual syndrome	名词	女性月经周期中的一种症候，以情绪低落和胃部痉挛为特征；经前综合征
vagina	名词	女性生殖器官；阴道
